- Made of 24 oz. cold rolled copper.
- Upper strap is 32 oz. cold rolled copper.
- Fitted close to tile so as not to hold-up row of tile above it.
- Includes two vertical pedestals of double 24 oz. copper making it the most stable / strongest snow guard on the market.
- Wide, flat copper base allows unit to hug close to tile.
- Medium height to provide stability.
- For new construction and retrofit - same snow guard.
- Available in lead coated copper or powder-coat at additional cost.
- Custom sizes are available.
