Type SGFR - for snow retention

Gough **SnoGuard**™ for Ludowici-Celadon French Clay Tile Roofs (right)

(Above) Type - SGFR
Gough SnoGuard installed

The Type **SGFR** Gough SnoGuard™ is actually the Type SGAR with a custom designed strap added to interlock with the Ludowici-Celadon clay roof tile.

Type SGFR

TYPICAL SIZES INDICATED ARE (+/-) 1/16" (1.6MM)

A* = 7 3/4"

B* = 6 1/4"

C = 1 1/4"

D = 1"

E = 3 1/4"

(* = vertical exposure)

- Made of 24 oz. copper.
- Includes two vertical pedestals each of double 24 oz. copper for strength (making each pedestal an equivalent of 48 oz. copper), making it the most stable & strongest snow guard on the market.
- Flat copper base allows unit to hug close to roofing material.
- Holding surface is almost 50% greater than others - helps retain more snow with each snow guard.
- For new construction or adaptable for retrofit.
- Also available in lead coated copper and powder coated metal at an additional cost and lead time.
- May be customized for different roofing materials and dimensions.
